- 2 Slide the leg covers on the side rails over the inner legs on the cross rails.

- 3 For Full, Queen, King, and California King sizes: install the center support rail. Fit the center support legs into the leg covers at the center of the cross rails at the head and foot of the frame.

- 4 Insert plastic sockets into the legs on the cross rails. Then insert the casters or glides (as appropriate to your model frame) into the plastic sockets. Make sure that the caster/glide is fully seated in the plastic socket.

- 5 Slip the end caps over the foot ends of the side rails (opposite the headboard brackets).

Your bed frame is now ready to use.
